9/4/2015

Dear Labor:

I have invested and traded my money for more than 50 years now. I have spent most of my life learning all facets of investing. For the past many years I have fed my family, sent my children to college and worked to save for my golden years (?). This proposal from the Department of Labor will make all my years of work and investing become useless in our IRA account.

This is the worst proposal I can imagine for all the baby boomers that are entering retirement age. Please do all you can to stop this proposal from going through.

Thank you in advance for your help!
Bruce J Sprich
